Highlights

Protective silicone
This case is made out of soft silicone which adds a layer of grip to your player, while it also protects your device against normal wear and tear.

Wrap-around protection
The material of this case wraps around from back to front, providing protection for the corners and perimeter of your device's face.

Internal channels absorb shock
For even better protection, the shock-absorbing material also features internal channels that distribute the shock within the case instead of transferring to your device.

Raised grip works both ways
From reading to gaming, this case is especially designed to improve your grip whether you're using your device in portrait mode or landscape mode.
